

ANNOUNCING NEW CUMMINS® ISM ENGINE PARTS & KITS

AFA Industries is pleased to announce the availability of a new Cylinder Kit, Piston Kit, In-Frame and Complete Overhaul Kits for the Cummins® ISM engine families.

Part Number OH28082423 - Complete Overhaul kit

Contains the cylinder kits, rod bearings, main bearings, thrust washers and full gasket sets to repair the engine while it is out of the vehicle.

Part Number IF28082423 - In-Frame Overhaul kit

Contains the cylinder kits, rod bearings, main bearings, thrust washers, upper gasket set and oil pan gasket to repair the engine while it is still in the vehicle.

**Part Number A4918787 - In-Frame Overhaul kit
equivalent to the Cummins® OE kit**

Contains the cylinder kits, rod bearings, main bearings, thrust washers, upper gasket set and oil pan gasket to repair the engine while it is still in the vehicle.

Part Number A28082423 - Cylinder kit

Contains the liner, liner seal, piston, piston rings, piston pin, and piston pin retainers.

Part Number A4089386 - Piston kit

Contains the piston, piston rings, piston pin and piston pin retainers.

Our kits include the induction hardened cylinder liner that is specified for this application. Some of the competition uses the non-hardened cylinder liner that will cause premature wear that will ultimately diminish performance and hours of use.

The above kits can be used for CPL numbers 8271, 8273, 8503, 8505, 8556, 8557 and 8558. This is not a complete list of CPL numbers that can use this particular piston application. Consult your OE reference materials for exact applications.

Also Available

Valve train parts, Water and Oil pumps, Cooling System Components, Fuel System Components, and other engine parts to help you repair most components for the ISM engine. Contact your local sales representative or AFA Certified Distributor for more information.

Total System Engineering

In 1987, AFA Industries started manufacturing OE and Aftermarket sealing products. Since then we have expanded into a global engine parts manufacturer with an extensive system of quality control and inspection that is second to none in the industry. Our technology is always state of the art. Materials used in our parts are always OE quality or better.

Our manufacturing methods are constantly monitored for consistency and efficiency.

**The results are products that will meet or exceed the expected life cycle of any heavy duty diesel engine in any application.
Guaranteed!**
